Project Proposal Template

Project: [Human Resource Dataset Analysis]

Objective:. Employee Attrition Analysis

Description: What factors are associated with higher employee attrition rates, and which employee groups are more likely to leave the company?

We can analyze the relationship between employee attrition and salary, overtime, department, tenure, and promotions.

Tools & Design: Power Bi

Technologies to Use: Power Bi

Team Members & Responsibilities:

1- Retal Sherif Sobhi Abo Elnagah (Cleaning and modeling the data)

2- Alaa Maher Abdelmonem Mohamed (1 dashboard with dax)

3- Haneen Magdy Mohamed Abdelaziz (2 dashboard with dax)

4- Afaf Badr Abdelaleem El Fetiany (2 dashboard with dax)

5- Nourhan Osama Saad Hamada (3 Dashboard with dax)

6- Ebtihag Ehab Abdel Tawab Mohamed (1 dashboard with dax)

Week 1: *[Data Cleaning and preprocessing]*

- Task:
  Data Processing: Clean and preprocessing the data using Power BI
  Tools: Power BI

Deliverables:

- Cleaned dataset ready for analysis
- Data preprocessing notebook

Week 2: *[Analysis Questions Phase]*

- Which employee characteristics and workplace factors are associated with higher attrition rates, and which employee groups should HR prioritize for retention efforts?

Deliverables:

- Set of analysis question that can be answered via the dataset.

Week 3: *[Dashboard Phase]*

- Task:
  Build Dashboard:
- Tools: Power Bi

Deliverables:

- Power Bi Dashboard

Week 4: *[Final Presentation]*

- Task:
  Final presentation: prepare a report and presentation summarizing the project work, including data analysis, model development, and deployment

Deliverables:

- Final report and dashboard
